

HEATED

Low Ink Edition

Thank you for supporting our game! This is a low ink version of our game for those who would like to print it at home, but do not want to spend as much money on printer ink.

We've done our best to remove most the color from the cards, without losing the ability to distinguish one card from another.

All game rules can be found by heading to HEATEDgame.com or by scanning the QR code to the right.

Important things to note:

- Cards with a gold mini-flame (see last pages) are part of the expansion pack. They do not need to be included to enjoy the standard game.
- If you enjoy playing this game, please tell your friends about it, or consider purchasing the official game.
- The fastest way to learn the rules is to play! Most cards say all you need to know about them right on the card. When confused, you can go back to the manual to read about small details as they come up.
- This game is protected under trademark licensing, which means you can't sell it or its likeness without our permission 😊
- Since this is the "Low Ink Edition," we cannot guarantee that this version will be colorblind friendly. Also, depending on your printer quality, it's possible the colors don't come out as bright as intended, so they may not be as distinctive.
- Have fun!

How to print at home (or work 🙄)

Print out this document double-sided. Exclude the first two pages. Do a test run of pages 3 and 4 to ensure everything is in working order. You don't want a misprint of 156 cards!

For each page, cut around the 4 cards to get rid of the excess paper. You do not need to cut on the edge of the cards yet. Leave some room for error.

Take one piece of laminate sheet (We recommend this one: <http://heatedgame.com/laminate>) and lay it down on the table.

Take TWO (2) pages of your pre-cut card pages and lay them side by side on the laminate. This is all to save you on laminate sheets.

Take another laminate sheet and place it on top of the card-sheet combo. Press down to get air bubbles out. BE CAREFUL! These stick very well together. If you mess up, it's best to reprint the pages. Less headache (trust us).

Cut the cards out along their edges.

You now have 8 cards! Repeat the above steps until all cards are laminated and cut!

Once you have all your cards, get a Deck Box (We recommend this one: <http://heatedgame.com/deck-box>) to keep them all together.

Alternatively, you can print this out on thicker cardstock (if your printer allows it), which might allow you to get away with not laminating it. Try it out with a single page and see if it's to your liking 😊
